Bijou Animal Started working with Rocky Mountain Cocker Rescue in August of 2014. We provide discounted spay/neuter services and medical care to the dogs RMCR rescues and places into foster care. This allows RMCR to adopt out their cockers by maintaining a 100% compliance rate on spay/neuter prior to adoption. Our discount also allows RMCR to stretch their money further so the new adoptive family has minimal health costs in the first year of ownership. To date, RMCR has consulted with us or has been in our clinic on countless occasions with at least 165 cockers. These consultations include exams, treatments, spay/neuters and dentistry.

Rocky Mountain Cocker goes above and beyond to ensure the best health for the dog and we are proud to be their primary vet in the Colorado Springs area.
